## Better Together: Amazon Business and Vroozi

### ✓ A streamlined learning curve:

Because Amazon Business works just like Amazon's website, employees can order the products they need from countless vendors in a familiar shopping environment.

### ✓ Increased visibility and accuracy for better spend analysis:

Organizations can oversee and track every purchase made, manage spend against budgets, and monitor trends.

### ✓ Better automation:

No buyer intervention is needed for purchase requests made using Amazon Business, streamlining the order, invoice, and payment processes.

## Together, Amazon Business and Vroozi offer numerous features to users, including:

### ✓ Guaranteed compliance:

Employees have access to more products through Amazon Business. Vroozi ensures compliance with your company's processes, agreements, and buying policies.

### ✓ Less rework and dispute processing:

More order accuracy and invoice matching leads to fewer processing errors. This results in less time and resources spent identifying and correcting mistakes.

### ✓ The convenience of a single online store:

One storefront with multiple suppliers reduces the time spent chasing down suppliers to set up and maintain catalogs.

### ✓ Quick and easy user adoption for your organization:

Get your business registered and start placing orders in no time!

## How Do Amazon Business and Vroozi Work Together?

### 1. Connect to Amazon Business.

Link your Amazon Business account to Vroozi using Vroozi's seamless PunchOut integration.

### 2. Browse and shop directly on the Amazon site.

Use the Amazon buying process to browse millions of products for your business. Empower your employees to prepare their own orders with the ease and convenience of shopping on Amazon.

### 3. Run your approval workflows.

Approvals in Vroozi ensure compliance with your procurement processes.

### 4. Automate purchase orders.

Approved purchase orders are sent electronically to Amazon for fulfillment. Employees can track their own orders.

### 5. Automate accounts payable invoice matching.

All invoices from Amazon Business are electronically received in Vroozi. Then, they're matched against purchase orders and goods receipts, ensuring accurate and fast invoice processing.
