

Vroozi welcomes BAMKO as the newest supplier on the VROOZI PREMIER SUPPLIER NETWORK

The **Vroozi Premier Supplier Network** reduces the time it takes to find, qualify, and connect digitally with premier suppliers for indirect products and services. Vroozi would like to welcome **BAMKO** as the newest supplier to the supplier network.

We are excited to announce the partnership with BAMKO to bring uniforms, promotional items, and branded products to customers in a digital procure-to-pay process. With BAMKO, companies will get the high-quality and unique products that will help promote and enhance their brand, attract new customers, and reward loyal customers. With Vroozi and BAMKO, customers will get the supplier performance with the quality that they require, and a fast, efficient digital requisition-to-payment process that saves time, money, and headaches.

How does it work?

From the Vroozi Marketplace, employees will access the BAMKO catalog (ie: punchout catalog) with the company's agreed pricing or discounts. Employees select and configure the products they need and return those items back to a Vroozi Purchase Request to follow the company's buying processes, including approvals, accounting assignments, budget checks, and spend categorization. Once approved, electronic orders trigger the fulfillment process to deliver the products to you fast. It's easy, and customers will get the control and visibility they desire with the speed and agility of today's modern digital processes.
