

**VROOZI REDBOOK**

# THE SUPPLIER DIRECTORY FOR FILM AND TV PRODUCTION

**STREAMLINED SEARCH, POWERFUL  
DISCOVERY, ACTIONABLE DATA**

**Vroozi Redbook** is a cutting-edge mobile supplier directory designed for the modern era of Film and TV Productions. The digital solution is tailored for Unit Production Managers, Coordinators, and Production personnel offering a streamlined way to search for authorized suppliers for any production including location, category, and other specialized criteria.

Utilizing the latest in AI and Cloud technologies, administrators can configure the platform for any production and studio, attach rate cards and certificates to supplier data, and invite authorized users to access and search the supplier directory across any device outside or within the company firewall.

Vroozi Redbook removes the traditional paper-based processes for production-based purchasing by integrating a digital and powerful search engine and business rules workflow to deliver productions on-time and within budget.

## SEARCH ENGINE

Our powerful search engine allows users to filter and search across and number of categories and attributes.

## CONFIGURABLE CONTENT

Create authorized supplier directories for productions and locations based on your suppliers from camera equipment to catering.

## ENRICHED DATA

Configure flex fields and meta data for any production supplier and attach additional information like certificates and rate cards.

## GEO-LOCATION MAPS

View all available suppliers within a given zip code and proximity to set location.

## SECURE USER ACCESS

Invite authorized users (employees and contractors) to any Virtual Redbook in Vroozi. Provision access rights including display only for sensitive supplier information.

## MOBILE

Access Vroozi Redbook across any mobile device including smart phones and tablets including laptops, on-site and always on.

# VROOZI REDBOOK KEEPS YOUR PRODUCTION ON SCHEDULE AND ON BUDGET – 100% DIGITAL

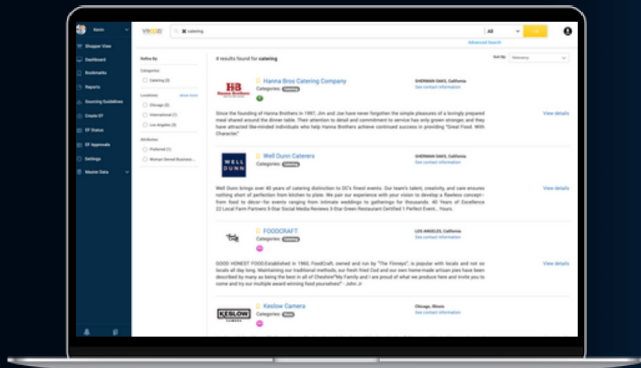

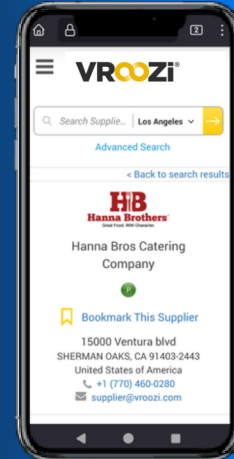

Give your production crew the visibility they need with Vroozi Redbook.

- Global supplier record database with configurable supplier attributes
- Integrated workflow for supplier exception requests
- Customizable graphics and sourcing policies and procedures
- Advanced search across multiple criteria including location, description, and category

## Fully configurable

Vroozi Redbook is a no-code, configurable solution for your studio. From solution branding to technical details like sourcing policies and special supplier requests to in-system announcements, studios can quickly launch production-specific directories with a few clicks.

## Intelligent Search

Vroozi Redbook's powerful and intelligent search engine returns the right suppliers into your teams' hands instantly. Production teams can search by location, category, supplier name, and other attributes. Finding your production suppliers has never been easier.

## Integrated Reporting

In-system reporting provides users and administrators a wide variety of data visualizations and insights into system usage and search terms. Administrators can export reports to Excel and other formats.
